

BUILDING OUR **FUTURE**

A positive environment for sustained bitumen demand

CONTENTS

FOREWORD FROM THE EUROBITUME PRESIDENT

3

If 2015 was about restructuring, 2016 was about delivering. The transformation has been completed and the organisation now has a renewed sense of purpose and positivity.

DIRECTOR GENERAL'S OVERVIEW OF 2016

4

It's "all systems go" for Eurobitume and we are demonstrating the ways we can create a positive environment for sustained bitumen demand with tangible results.

SHARING KNOWLEDGE EFFECTIVELY

5

There is abundant expert knowledge among the Eurobitume membership and we see it as our role to make sure that it is shared to create value for our members.

SPEAKING WITH A STRONG, SINGLE VOICE

8

Now more than ever, it is important that we coordinate the way we communicate with all our stakeholders on bitumen related issues in order to maximise the impact of our message.

PROMOTING MEMBERS' INTERESTS AT EVENTS

11

Participating actively in events at both local and European level enables us to speak directly with key influencers and demonstrate effectively what our organisation offers.

EUROBITUME COMMITTEES AND TASK FORCES

14

The committees and task forces that make everything Eurobitume achieves possible. Find out more about the people who give their time and expertise to these important bodies.

CONTACTS

15

Want to find out more about Eurobitume?

FIRST WE RAISED EXPECTATIONS. NOW WE ARE MEETING THEM.

“We’re in a great position now to participate in dialogues which will directly help our members by getting the right messages to the right people.”

Siobhan McKelvey
President of Eurobitume

The foundations of our new organisation are built and have been tested. I can’t emphasise strongly enough what a step change we have made in the last year. The process of integration is over and now we are “walking the walk” as we begin to see the actual benefits of coming together as a single organisation acting with one voice.

The theme of this annual review, “Building our future”, is a fitting one. We have now put strong foundations in place to create a positive environment for sustained bitumen demand and we are experiencing the rewards in three key areas:

Sharing knowledge effectively

As a more streamlined organisation, we are transferring ideas, knowledge and best practices more easily and more efficiently. This is particularly important at a local level where national organisations are benefiting from information sharing from other countries. While local issues can still be handled locally each national organisation now has access to a huge, international pool of knowledge about how best to tackle the issues they face.

Speaking with a strong single voice

We are now truly speaking with a single voice. I think it’s so important that we have a coherent approach in order to maximise our ability to communicate our key messages – and having a unified image is all part of that. We are, in a way, the “brand” of bitumen and seen as a strong influencer able to discuss issues affecting our industry at any level. Above all, we are in a great position to participate in dialogues which will directly help our members by getting the right messages to the right people.

Promoting members’ interests at events

A key way for us to share information is through the events we organise and attend. The integration has helped us do that more effectively than ever. Last year’s E&E (Eurasphalt & Eurobitume) Congress was a powerful platform to demonstrate that the reorganising was over and we were now starting to deliver. Unprecedented participation levels at our March and October meetings is a clear sign that people are listening and we are delighted to be expanding the membership as more and more companies see the benefits of coming under the Eurobitume umbrella.

The biggest challenge we now face is that of raised expectations. That’s good. It’s a sign that we are growing. We need to manage that growth now and channel it correctly in order to make a real difference for our members and ultimately the bitumen industry.

I am delighted with the sense of positivity that is running through the veins of the organisation now. And I’d like to thank all our members and the Eurobitume team in general for their commitment to change and the professional way that they have brought it to fruition.

This is it. There’s no going back. The new system is up and running and we’re looking forward with great confidence to the future.

A handwritten signature in black ink that reads "S. McKelvey".

Siobhan McKelvey
President Eurobitume

DIRECTOR GENERAL'S OVERVIEW OF 2016

Aimé Xhonneux
Director General of Eurobitume

2016 was the year we started to deliver on the promises made during integration. The work is ongoing, but it's now my proud task to report on the first fruits of our new, streamlined organisation which is bringing benefits at every level of our operations.

A growing membership

Following changes to our statutes, we introduced a new membership structure which included for the first time "associate members". This has been a great success in attracting new members including ATPC, Kraton, Hoyer and BTC. There has also been a significant increase in the numbers of enquiries about membership on our website which clearly demonstrates that we are becoming a focal point for many stakeholders. At the same time, the Membership Committee is keen to manage this growth and to ensure that the needs and expectations of existing members continue to be met in full.

A wider audience

Another way of opening our doors wider was to look at the way we arrange our General meetings. For a start, we changed their names from "AGM" and "EGM" to "Spring Meeting" and "Autumn Meeting" as a way to broaden their appeal and to attract greater participation from members. We also changed the format of the meetings. Last year's Stockholm Autumn Meeting took place over two days and certain sessions were opened up to non-members so that they could get a real feel for what our organisation is all about. This was a big success. It attracted over 70 attendees including 21 from non-member companies who expressed an interest in becoming EB members in the future.

Improved communications

We also put a far greater emphasis on communications in 2016. In particular, I would like to highlight:

- Our new **Eurobitume website**, which is available in four languages, went live in May
- The **Asphalt Advantages website** celebrated its second year and continues to give more and more convincing arguments in favour of Asphalt

WE ARE TURNING WORDS INTO ACTIONS. HERE'S HOW.

“The transformation has created a totally modernised organisation that is capable of tackling the challenges we face today.”

- We posted regularly on the main **social media platforms** in order to keep stakeholders up to date with the latest issues
- We liaised with the European parliament, organising an **“MEP Breakfast”** with EAPA which was an excellent opportunity to demonstrate to Members of European Parliament the sustainability of asphalt roads
- We published the second issue of our **Eurobitume magazine** especially for the E&E congress in June

Events continue to be a major channel for us to spread the word. Last year's high profile **E&E Congress** was a huge success attracting more participants than ever with 1077 registrations, 172 exhibitors and 10 sponsors. Normally occurring every four years, we have now decided to introduce an intermediate event in order to have an E&E platform every two years to make the most of its increasing popularity.

As Siobhan mentions in her foreword, we are keen not to lose the “local touch” and last year demonstrated how we can work at both European and national levels. Some of the local events we took part in included:

- The **Bavarian Breakfast** in Berchtesgaden run in parallel with Deutscher Asphaltverband's **Asphalt Days** to build awareness of Eurobitume with potential new members
- **Eurobitume Swiss Bitumen Day**, now organised every second year
- **Rencontres Bitume**, the new EB France organisation's first event which attracted over 100 people
- **Belgian Asphalt and Bitumen Day**, the first event organised jointly by Eurobitume Benelux and the Belgian contractors' association BVA which attracted 241 participants
- **Asphalt Dag**, jointly run for the first time by VBW Asphalt (the Dutch contractors' association) and Eurobitume which attracted over 450 people

New HSE guidance

We issued revised **burns** and **safe handling cards** which are now available to members in 16 languages. At France's request, new **H₂S guidance documents** and **cards** were also produced which will also be available in 16 languages.

We also maintained our strong collaboration with ANSES and INRS in France, Bitumen Forum and Dr Rühl in Germany as well as the AIA (Asphalt Industry Alliance) in the UK and we started a collaboration with Mensura in Belgium.

The HSE Committee continued to focus on health issues including worker protection. Co-financed by our US colleagues of the Asphalt Institute (AI), a new meta-analysis was started by Prof Boffetta following the publication of IARC Monograph 103. We also set up an important review of the LCI (life cycle inventory) which is ongoing.

Consensus on revised standards

Our Technical Committee reviewed performance tests methods and invested a lot of effort into revising EN 12591 (the standard for paving grade bitumen) and EN 14023 (the standard for PMB). It succeeded in reaching a consensus on the Eurobitume position for our bitumen producers about the revisions. This position should be used as input into the official CEN process – yet another - example of how Eurobitume members are working together.

Stronger relationships

Last but not least in 2016, we extended our close working relationships with key bodies like the contractors' association EAPA and the US bitumen association Asphalt Institute (AI). We actually shared a stand at E&E with AI and they also have an ex-officio member on our HSE Committee. We attended their annual meeting in Scottsdale, Arizona, in December and provided an update to their members on our activities.

These were just some of the highlights from a resurgent year. I hope you will enjoy reading more about them in the following pages.

Aimé Xhonneux
Director General

SHARING KNOWLEDGE EFFECTIVELY

Each of our three main committees – Technical, HSE (Health, Safety and Environment) and PRC (Public Relations and Communications) – comprises experts in their respective fields. They play an important role in collating and analysing information and identifying best practices before making it available to members and communicating the benefits more widely. The output from these expert committees helps to generate a number of important activities and deliverables – both for members’ use and for more general use by stakeholders to support our mission. Here we look at some of the outcomes from the last year.

HSE guidance

In Benelux last year the HSE Committee provided expert input to Mensura, an organisation which promotes Health & Safety in the workplace, on their draft “Fiche Bitumes” information sheet, and also supplied valuable information to the Asphalt Worker Trade Union and Asphalt

Association on the safe handling of bitumen and treating bitumen burns.

In France, the HSE Committee worked closely with INRS, the French Institute for occupational risk prevention, regarding exposure to bitumen fumes, and with ANSES, the French Agency for Food, Environmental and Occupational Health & Safety.

Meanwhile in Germany, the HSE Committee supported the MAK Commission (the German committee for the determination of occupational exposure limits) with data and expert insight to help them review the health effects of emissions from hot bitumen.

Providing guidance and positions on various industry issues is an important role for Eurobitume. In 2016 we produced new updated versions of our informative Safe Handling of Bitumen cards incorporating the latest expert advice and reflecting current regulations in 16 European languages. These cards are freely available to members. Similarly, an H₂S guidance document was prepared for member’s use and is available from the Eurobitume intranet.

WORKING TOGETHER TO ACHIEVE COMMON GOALS

The ability to share expertise and discuss challenges with industry colleagues and to learn from their experiences and best practices are key benefits of Eurobitume membership

“Embracing Change” event in the UK

In the UK, more than 90 delegates – including representatives from nearly 50 local authorities in England and Wales – attended “Embracing Change”, a *Sharing Best Practice event* organised by the Asphalt Industry Alliance which is a partnership between Eurobitume UK and the Mineral Products Association.

Improving the quality of roads in France

Eurobitume France is involved in a nationwide forum to improve the quality of roads in France. “Observatoire National de la Route” comprises all the main French road network stakeholders and is gathering detailed information about the condition and maintenance of the country’s road network. It will assess the effectiveness of different technical road network management policies and this knowledge will enable better-informed decisions to be made regarding road network maintenance.

Eurobitume Magazine #2 published

The second issue of Eurobitume Magazine was launched at the Eurasphalt & Eurobitume Congress in Prague. It explores the need to invest in our greatest asset – roads – with views from road users and road owners as

well as solutions offered by our industry. Available in English, French and German, Eurobitume Magazine contains an interesting mix of news and views from across the European bitumen industry. The latest issue supports many of the key messages delivered at the 2016 Congress and also looks at how the bitumen and asphalt industries are providing effective and efficient solutions for a range of applications.

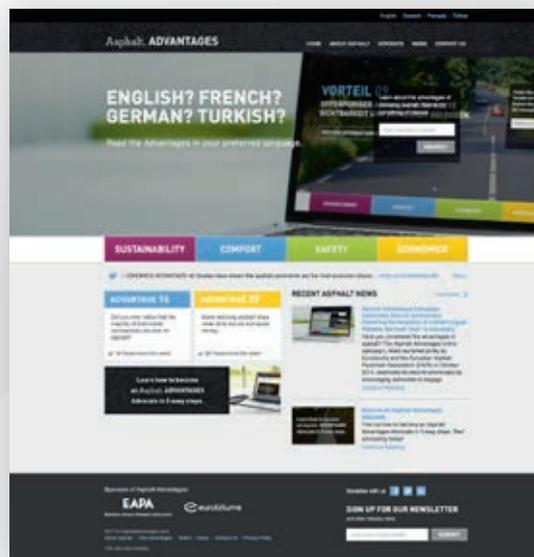

Promoting the advantages of asphalt online

The Asphalt Advantages campaign, our joint initiative with EAPA to promote the benefits and value of asphalt pavement to those who use, design and maintain roads, has now reached stakeholders in over 125 countries and in 2016 celebrated its second anniversary (see www.asphaltadvantages.com).

Earlier in the year the campaign was extended to offer the choice of English, French, German and Turkish, which is helping to expand the scope of the campaign by reaching new target audiences and local markets.

Towards the end of 2016, as part of its anniversary celebrations, the campaign encouraged supporters to embrace an online tool kit and how-to video as well as getting them to create their own sub-campaigns.

The www.asphaltadvantages.com website continues to grow and is now widely recognised as a valuable source of credible information for a wide range of stakeholders, raising the awareness of the many benefits that asphalt offers for road maintenance and construction.

SPEAKING WITH A STRONG, SINGLE VOICE

Speaking with a strong, single voice gives our message more impact and promotes members' interests more powerfully than ever.

These days there are an unprecedented number of channels we use to communicate with each other. At national and international level, face to face or online, between governments and trade associations, it has never been more important to coordinate messages to avoid our voice being lost. In the last year Eurobitume has presented a single strong voice through all these channels and presented a strong image to the outside world which gives us credibility and real influence.

New, multi-language website provides a single voice for Eurobitume

Eurobitume now has a new, easy-to-use, fully integrated, multi-language website which helps the association speak with a powerful single voice for the bitumen industry in Europe. Visitors to www.eurobitume.eu can access a wealth of valuable general, technical, health, safety and environmental information about bitumen and the bitumen industry in Europe in four languages – Dutch, English, French and German. The new website is also the single source of information for country-specific guidance and advice generated by the association's various local initiatives.

Developing an industry position on standards

Specialist task forces and working groups feed into the Technical Committee and address specific technical issues such as the evolution of technical standards, European standardisation, establishing the European bitumen industry's position on CE Marking and the development of uniform test methods. One of these working groups developed a bitumen industry-agreed set of proposed revisions for EN 12591, the European standard for paving grade bitumen which is in the final stages of editing within CEN and expected to go to formal vote in 2017.

Another working group has begun to follow actively the review process of EN 14023, the standard for polymer modified bitumen, and CEN Enquiry is possible in 2017.

Towards the end of the year, our Technical Committee set up two new task forces, TF Test Methods and TF Standardisation.

TF Test Methods will develop a formal position for Eurobitume on specific test methods, how results could be

interpreted and whether or not they are likely to be useful for incorporation into new standards. TF Standardisation will consider more general aspects of the CEN systematic review process and how to co-ordinate a Eurobitume position into the revision process, through the National Mirror Committees.

Life Cycle Inventory Review

A special task force has been established to review Eurobitume's Life Cycle Inventory (LCI) methodology regarding the amount of CO₂ and other emissions which should be attributed to bitumen throughout its life cycle. This ongoing work is being undertaken in discussion with CONCAWE, the expert body focussed on environmental science for the European oil refining industry and the Asphalt Institute in the United States. Public relations and communications

The Public Relations and Communications (PRC) Committee is responsible for a suite of internal and external communications tools deployed to support Eurobitume's mission of promoting the safe and effective use of refined bitumen.

Internal and external communications highlights from last year include the preparation and issue of internal e-bulletins and messages from the DG, the launch of our new, multi-language website, publication of the second Eurobitume Magazine, establishing an active presence for Eurobitume on social media, external press releases picked up by a wide selection of national and international trade media, numerous website updates and an external e-newsletter.

Active presence on social media

We expanded our online presence by establishing active Eurobitume profiles on Facebook, LinkedIn and Twitter, which provide additional opportunities for stakeholders to find out more about the latest bitumen industry news, events and specific product updates on safe handling, specifications and standards.

As well as providing platforms for communicating the most up-to-date information, these channels are also excellent for developing professional networks and sharing best practices with other key stakeholders.

Membership growth

2016 was the first full year for the Membership Committee, which supports the Director General in attracting and selecting potential new core and associate members, as well as with the retention of existing members. One specific focus last year was to identify and define specific areas that provide value for members.

Our position as the single, powerful voice of the bitumen industry in Europe strengthened throughout the year, as more organisations chose to join Eurobitume: BTC Europe, part of the BASF Group; international bitumen haulier HOYER Bitumen-Logistik GmbH and international polymer and additives producer Kraton joined as associate members.

MEP breakfast debate about asphalt

In November, our President Siobhan McKelvey and Technical Director Mike Southern represented the European bitumen industry at an important breakfast debate at the European Parliament in Brussels about environmental responsibility and innovation in the asphalt pavement industry.

All Party Parliamentary Group on Highways

In the UK, Eurobitume UK supports the All Party Parliamentary Group (APPG) on Highways, which has maintenance issues at its heart as it aims to promote the safety, environmental, economic and social case for local roads in the United Kingdom and the need for an integrated approach when it comes to ensuring the network delivers.

Decades of underfunding taking its toll on roads

Eurobitume UK and the Mineral Products Association, its UK asphalt industry partner in the Asphalt Industry Alliance, conducted the 21st ALARM (Annual Local Authority Road

Maintenance) survey into the condition, maintenance and funding of roads.

This year's survey revealed long-term underfunding, severe weather and increased traffic are undermining the resilience

of the local road network in England and Wales, which local authorities calculate now requires almost €12 billion of investment to bring them up to scratch. The survey's report is used to help campaign for additional funding for UK road infrastructure and maintenance.

A stronger voice in France

Eurobitume France now has greater visibility within key French government ministries and the mainstream media after becoming an Associate Member of UFIP (French Union of Petroleum Industries).

Working safely with bitumen in Germany

Eurobitume representatives attended the annual meeting of the German Bitumen Forum, an independent group of authorities, scientists and stakeholders with an interest in enhancing the safe working conditions of all those involved with bitumen.

PROMOTING MEMBERS' INTERESTS AT EVENTS

Events – where relationships are established and viewpoints exchanged.

Throughout the year we organised a number of internal and external events to help members and other interested parties find out more about the latest developments relating to the bitumen and asphalt industries, to share their knowledge and to discuss common industry challenges and opportunities.

New format meeting well received – 2-3 March, Brussels

At our new format two-day Eurobitume Spring Meeting, member company representatives and external organisations interested in joining heard about the new organisation of Eurobitume, our activities, achievements and progress with the forthcoming E&E Congress in Prague.

During the official part of the General Meeting, there were comprehensive reports about the activities of the four committees and the budget was approved. The seven current members of the Board of Directors and the Senior Officer roles were confirmed, and the AGM unanimously approved the application of Antwerp-based refiner ATPC to join as an Associate Member.

Asphalt & Bitumen Day – 15 March in Brussels, Belgium

Jointly organised by Eurobitume and the Belgian Association of Asphalt Producers (BVA/ABPE), the 2016 Asphalt & Bitumen Day took place at the Diamant Conference & Business Centre in Brussels attracting 240 participants from the industry and authorities.

The programme opened with keynote presentations by AWW Administrator General Tom Roelants and SPW Director General Etienne Willame, who gave their insights into the upcoming infrastructure developments in Flanders and Walloon respectively.

There were also more technically-oriented presentations covering noise reduction in urban areas; specifications; Bitumen production; surface treatments; skid resistance and pavement management.

Inaugural Rencontres Bitume - 30 March, Paris, France

The first Eurobitume France-organised *Rencontres Bitume* was a great success, with approximately 120 attendees inside the prestigious building of FNTP (National Federation of Public Works) near the Champs-Élysées.

The conference featured interesting presentations by senior industry figures including: Jean-Michel Michou, Director of Eurobitume France; Isabelle Muller, General Delegate of UFIP (French Union of Petroleum Industries); and Emmanuel Chailleux, Head of Department of IFSTTAR (French Institute of Science and Technology for Transports, Development and Networks).

In addition, Marc Tassone, Director General of IDRRIM (the Institute for Roads, Streets and Mobility Infrastructure), explained the missions of the Institute, the latest on warm mix asphalt, surface dressings and slurry seals. He also discussed the creation of the *Observatoire National de la Route*; and Yves Krattinger, President of IDRRIM and President of the Department Council of Haute-Saône, highlighted the need to maintain road assets in the best interests of the public sector, the private sector and citizens.

Swiss Bitumen Day – 7 April, Kursaal Bern, Switzerland

Approximately 90 people from the industry and authorities attended the successful 3rd Swiss Bitumen Day at the Kursaal in Bern, organised by Eurobitume Switzerland to help industry stakeholders find out more about the latest industry developments and network with renowned industry experts.

The presentations covered an interesting mix of subjects including 'Determining the presence and effectiveness of adhesives', the 'Experience with EME road pavements, low temperature asphalts and recycling issues', and 'Influencing the properties of bitumen from the point of view of the refinery – Myth & Facts', about the complexity of refining bitumen.

6th Eurasphalt & Eurobitume (E&E) Congress – 1-3 June, Prague, Czech Republic

1,077 people from more than 20 countries attended the 6th Eurasphalt & Eurobitume (E&E) Congress, *Investing in our greatest asset: roads.*

Staged every four years, this unique event brought together individuals associated with the bitumen, asphalt and road industries from around the world to hear about the latest cutting-edge developments and ground-breaking research, and to discuss important topical issues with fellow experts. The congress was addressed by an impressive selection of prominent speakers including Dan Tok, the Czech Republic Minister of Transport; Ismail Ertug MEP, the Social Democrats Coordinator for the Committee on Transport and Tourism (TRAN) in the European Parliament; Thierry Goger, Secretary General of the Forum of European National Highway Research Laboratories (FEHRL), and Jean-François Corté, former Secretary General of the World Road Association (PIARC).

Members of Eurobitume’s Technical Committee, chaired by Frédérique Cointe from ExxonMobil, supported the technical programme for which 247 technical papers were accepted, 45 oral presentations delivered and there were two very popular poster sessions.

The technical presentations covered a wide range of topical areas, including: warm asphalt mixtures; mixture and performance testing; recycling; sustainable development; health, safety and environment; maintenance and rehabilitation, and binder performance and testing.

For the first time, the Congress also included popular workshops and seminars on less technical issues, such as communications and finance. Meanwhile alongside the Congress, 58 organisations exhibited their products and services to delegates.

The 7th E&E Congress will take place in Madrid on 12-14 May 2020, and two years prior to that, on 14-15 June 2018, there will be an inaugural E&E Event in Berlin.

Eurobitume Autumn Meeting – 19-20 October, Stockholm, Sweden

More than 70 people – from member companies, prospective new member organisations and the Asphalt Institute in the United States – attended the Eurobitume Autumn Meeting.

On the first afternoon there was a seminar with interesting talks on topical technical, HSE and communication themes, as well as a presentation by guest speaker Bjorn Hasselgren from Trafikverket, the Swedish Transport Administration, about the new challenges of road construction and investment.

During the General Meeting the following morning, there were reports on the important work done by the Eurobitume committees and local initiatives, as well as a presentation by our good friends at the Asphalt Institute in the United States.

13

Asfaltdag 2016 – 13 December, Amersfoort, Holland

Close to 500 people attended Asfaltdag 2016 in Amersfoort, where the main themes were durability and innovation. Experts also addressed a variety of other topics including the usage and maintenance of roads; infrastructure; specifications; contracts and future developments in how roads will be used.

Alongside the Congress, where the networking opportunities were also excellent, 50 companies and institutions showcased new developments in materials, inspection tools, design and control.

EUROBITUME COMMITTEES AND TASK FORCES

Members of Eurobitume committees in 2016.

Individuals from Core and Associate Member organisations, Local Initiative representatives and Eurobitume staff worked together in the following groups during 2016:

Board of Directors

Emma Mallinson - Shell
Siobhan McKelvey - Nynas (President)
Valentino Monasteri / Maria Rita Valentineti - Eni
Marc Montagnat - Total
José Luis Prieto - Cepsa (Vice President)
Markus Spiegl - OMV (Treasurer)
Charlotte Toulemonde - ExxonMobil
Benoit Vandermeeren - ATPC (since March 2016)
Aimé Xhonneux - Eurobitume

Board of Directors Tag

Mike Southern - Eurobitume

General Meeting

Robert Gregan - Kraton (since October 2016)
Jaime Halcon - Repsol (since April 2016)
Emma Mallinson - Shell
Susana Maricato - Petrogal
Siobhan McKelvey - Nynas
Carsten Meyer - Hoyer (since October 2016)
Marc Montagnat - Total
Reinder Oosterhof - Kuwait
José Luis Prieto - Cepsa
Alfredo Punzo - API
Samuel Torres - Repsol (until April 2016)
Mike Southern - Eurobitume
Markus Spiegl - OMV
Charlotte Toulemonde - ExxonMobil
Maria Rita Valentineti - ENI
Benoit Vandermeeren - ATPC
Zachary Vuong - Puma Energy
Aimé Xhonneux - Eurobitume

HSE Committee

Mario Barranco - Cepsa
Sandra Bazquez Borrás - Repsol
Javier Candeal - Repsol
Lize Deferme - ExxonMobil
Elisabetta Di Caprio - Eni
Jim Freeman - ExxonMobil
Alvaro Gonzalo Sanchez - Cepsa
Erica Jellema - Kraton (since October 2016)
Hans Ketelslegers - Concawe
Karin Hennung - Nynas (Chair)
Carsten Meyer - Hoyer (since October 2016)
Jean-Michel Michou - Eurobitume France
Victoria Ochoa - Cepsa
Carl Robertus - Nynas (since October 2016)
Anja Sörensen - Eurobitume Deutschland
Paul Sohi - Asphalt Institute
Mike Southern - Eurobitume
Chris Southwell - Eurobitume UK
Markus Spiegl - OMV
Steve Stuthridge - Shell
Mathieu Vaissière - Total
Benoit Vandermeeren - ATPC
Aimé Xhonneux - Eurobitume

Membership Committee

Jaime Halcon - Repsol
Siobhan McKelvey - Nynas
Marc Montagnat - Total
José Luis Prieto - Cepsa (Chair)
Markus Spiegl - OMV
Keith Stone - Shell
Charlotte Toulemonde - ExxonMobil
Aimé Xhonneux - Eurobitume

Technical Committee

Frank Beer - Shell
David Bell - Kraton (since October 2016)
Jeroen Besamusca - Kuwait
Frédérique Cointe - ExxonMobil (Chair)
Gilles Gauthier - Total (until September 2016)
Ian Lancaster - Nynas
Andreas Loibl - OMV
Susana Maricato - Petrogal
Carsten Meyer - Hoyer (since October 2016)
Jean-Michel Michou - Eurobitume France
Olivier Moglia - Total (since October 2016)
Vicente Perez - Cepsa
Antonio Páez Dueñas - Repsol
Alfredo Punzo - API
Heinz Rusch - Eurobitume Switzerland
Anja Sörensen - Eurobitume Deutschland
Mike Southern - Eurobitume
Chris Southwell - Eurobitume UK
Theo Terlouw - Eurobitume BNL
Maria Rita Valentineti - ENI
Benoit Vandermeeren - ATPC
Zachary Vuong - Puma Energy
Aimé Xhonneux - Eurobitume

PRC Committee

Johanna Andreasson - Nynas
Alvaro Macarro - Cepsa
Emma Mallinson - Shell (Chair until March 2016)
Siobhan McKelvey - Nynas (Chair since March 2016)
Jean-Michel Michou - Eurobitume France
Sharon Mo Ajok - Kraton (since October 2016)
Anja Sörensen - Eurobitume Deutschland
Chris Southwell - Eurobitume UK
Marion Thillou - Shell
Benoit Vandermeeren - ATPC
Agnès Villautreix - Total
Aimé Xhonneux - Eurobitume

Eurobitume Benelux

Jeroom Helsen - Total Belgium (since October 2016)
Anton Kroon - Total Nederland
Laurent Michon - ExxonMobil
Karel Poncelet - Shell
